San Diego, CA

(747) 275-9821

chl091@ucsd.edu

Business Analyst with 3 years of experience. Managed 1.3M+ user datasets, standardized KPIs, and boosted ROME from 0.03 to 0.52. Adept at leading cross-functional teams to translate complex behavioral data into actionable growth strategies.

EDUCATION

Master of Science in Business Analytics, Rady School of Management Dec 2026
University of California, San Diego, CA | Competitive Merit-based Scholarships (\$25000)
Cohort Representative (MSBA '25) — Elected by 168 peers; managed logistics, RSVP tracking, and attendance forecasting
Related Courses: SQL and ETL, Predictive Business Analytics, Business Intelligence Systems, Customer Analytics and AI
Bachelor of Science in Cognitive Science: Machine Learning and Neural Computation Mar 2025
University of California, San Diego, CA | Provost Honors Award

EXPERIENCE

Business Analyst Intern, Owaves Inc., San Diego, California Nov 2025 – Mar 2026
Health tech company offering AI-driven circadian intelligence to optimize users' performance through behavioral data

- Defined KPI requirements and standardized metric definitions across product data (~1.3M users, ~615M activities); delivered executive dashboards and weekly readouts directly to the CEO to support strategy and investor discussions
- Analyzed conversion funnels in Mixpanel and Google Analytics for subscription paywalls and integrations (Apple Health, calendar sync), and built "super-user" segmentation from behavioral and profile data to inform growth strategy
- Leveraged LLM tools to accelerate exploratory analysis and hypothesis generation on user behavior and funnel drop-offs across 228 events, cutting analysis cycles by 67% and translating insights into decision-ready recommendations

Business Analytics Research Assistant, Rady School of Management – UC San Diego Sep 2025 – Nov 2025

- Built a Python reporting pipeline to clean and summarize survey data on online gambling behavior, auto-generating question-level charts to support feasibility assessment and stakeholder decision-making for digital self-regulation tools

Business Analytics Lead (Intern), Resilience Inc. (501(c)(3)), Tampa, Florida July 2024 – Jun 2025
EdTech company focused on Social Emotional Learning programs that promote emotional intelligence and mental well-being

- Led a 17-member analytics intern team to standardize KPI definitions across 12 departments and implement a reporting cadence; delivered dashboards and executive-ready summaries to improve performance tracking and accountability
- Implemented role-based access & offboarding controls to improve data governance and reduce reporting inconsistencies

Data Analyst, Zhongchi Group Co., Ltd, Shandong, China Nov 2020 – Sep 2022
Data-informed real estate brokerage and financial services group with 30+ offices and 500+ agents across China

- Implemented an ERP-style property and deal-tracking system to centralize fragmented WeChat workflows into a searchable database, reducing lookup time from ~15 minutes to ~10 seconds and adopted by ~400 agents
- Defined KPIs and delivered weekly dashboards to monitor engagement and conversion trends across 30+ offices
- Built client-segmentation models to identify high-conversion customer groups and optimize targeting strategies

SPECIALIZED SKILLS

- Data Programming:** Python (Pandas, NumPy, Scikit-learn), SQL (Joins, Window Functions), data cleaning, R, ETL, Git, AWS
- Analytics:** KPI standardization, segmentation, forecasting, regression analysis, A/B testing & experiment analysis
- BI & Reporting:** Power BI, Tableau, Excel (pivot tables), executive dashboards, Mixpanel & Google Analytics
- Stakeholder Delivery:** executive-ready readouts, decision support, cross-functional collaboration, LLM-assisted analysis

PROJECTS

Customer Churn Prediction & Retention Strategy for S-Mobile Telecom ([GitHub](#)) Mar 2026

- Developed churn prediction models (Logistic Regression, XGBoost) on 69K telecom customers to support proactive retention targeting, achieving AUC 0.76 and identifying key churn drivers such as device age and customer tenure
- Simulated targeted retention interventions (e.g., upgrade offers and plan optimization) using model-based counterfactual analysis, reducing predicted churn from 1.85% to 1.54% and increasing customer lifetime value by ~\$124 per subscriber

Mobile Promotion Targeting Optimization for Tuango Deal Platform ([GitHub](#)) Jan 2026

- Developed a reproducible Python pipeline to model push-message response for 418K users via logistic regression; identified high-impact behavioral drivers and calculated a 9.32% breakeven threshold using unit economics
- Optimized campaign efficiency by replacing mass-outreach with a data-driven strategy, reducing outreach volume by 56% (397K → 174K) while increasing realized profit from 112K to 887K RMB (improving ROME from 0.03 to 0.52)
